

MOON QUICK START GUIDE

1. Turning the Moon on

- a. The Moon can operate plugged into an outlet, using batteries, or both.
- b. To insert batteries, open the battery pack using a screwdriver, and place 3 new (AA) batteries.
- c. Make sure to always **firmly press** the buttons to ensure proper function.

2. Setting the clock and wake up times

- a. Press and hold the set button for up to 5 seconds to display the Settings Menu. The menu can be navigated using the “UP” and “DOWN” buttons. Highlighted options can be selected by pressing the “SET” button again.
- b. Select the “SET TIMES” option.
- c. Select the “CLOCK” option.
- d. Select the “AM/PM 24H” option.
- e. Select whether you would like to clock to use a AM/PM cycle or a 24H cycle, and press the “SET” button to confirm.
- f. Highlight the hours, and press “SET” to set the hours, using “UP” and “DOWN” buttons. Press set again to finish setting hours.
- g. Repeat step f. with minutes.
- h. Highlight the  option to return to the previous screen.
- i. To set the time at which you would like your child to wake up **in the morning during the week**, select “WAKE UP 1W” and repeat steps f. through h. To set the time at which you would like your child to wake up **from their nap during the week**, select “WAKE UP 2NAP” and repeat steps f. through h. To set the time at which you would like your child to wake up **during the weekend** (see 3b below), select “WAKE UP 3WE” and repeat steps f. through h.

3. Bedtime

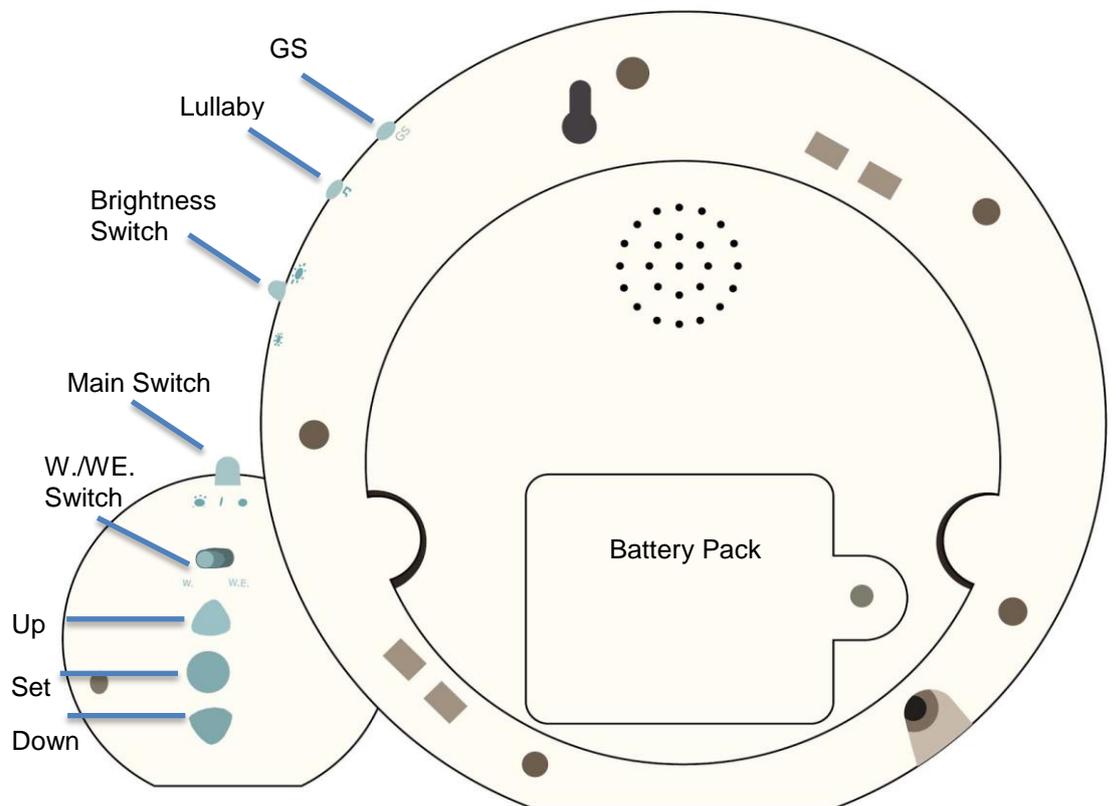

- a. Make sure to reset the Moon by setting the Main Switch to **O**.
- b. Make sure that the “W./W.E.” Switch is set to **W.** during the week, and **W.E.** during the weekend.
- c. When your child goes to bed, set the Main Switch to **I**.

At that time, the rabbit will always light up in the sleeping position, and the LCD will show the moon. Ten minutes before the next set wake up time, the moon will begin setting on the LCD to let your child know that it’s nearly time to wake up. This is called the **“Wake up Process.”**

When it is time to wake up, the sun will rise, and the light will change to the waking rabbit.

- d. Upon waking up, you may switch off the light by setting the Main Switch to **O** in order to save

energy

Additional Options

For the additional options below: To choose your desired option, press the “SET” button, make your selection using the “UP” and “DOWN” arrow keys, and confirm your choice by pressing the “SET” button again.

Alarm Clock

To use the Moon as an alarm clock, set the Main Switch to  at bedtime instead of **I**. The transition to the waking rabbit will be accompanied by an alarm melody. There are four different alarms melodies to choose from.

Setting alarm choice: Settings Menu > SET MELODY > ALARM >  > Set choice

Setting alarm volume: Settings Menu > SET MELODY > ALARM >  > Set volume

GS “Go to Sleep” Routine

To let your child know if it’s time to get prepared for bedtime, you can use the “Go to Sleep” routine. At bedtime, once the main switch is set to either **I** or , press and hold the **GS** button for up to 5 seconds. **At that time, the rabbit will switch to the awake position, and the LCD will display the sun.** The sun will slowly set for ten minutes. After ten minutes, the moon will rise on the LCD, and the rabbit will switch to the sleeping position. You can choose how long the routine lasts, and whether it displays a sunset or an hourglass graphic.

Setting graphic: Settings Menu > LCD SCREEN > GO TO SLEEP > /  > Set choice

Setting duration: Settings Menu > LCD SCREEN > GO TO SLEEP > (MIN BEFORE SLEEP) > Set duration

Wake up Process

The wake up process is a clever way for the Moon to let your child know if is nearly time to wake up. Ten minutes before it is time to wake up, the moon begins to wane on the LCD, with a countdown underneath it to the set wake up time. You can choose how long the routine lasts, and whether it displays a moonset or an hourglass graphic.

Setting graphic: Settings Menu > LCD SCREEN > WAKE UP PROCESS > /  > Set choice

Setting duration: Settings Menu > LCD SCREEN > WAKE UP PROCESS > (MIN BEFORE AWAKE) > Set duration

Lullaby

The Moon can play one of four lullabies, which will stop after around three minutes.

To play the selected lullaby, press and hold the Lullaby Button () for up to 5 seconds. The lullaby can be stopped by pressing and holding the Lullaby Button again.

Setting lullaby choice: Settings Menu > SET MELODY > LULLABY >  > Set choice

Setting lullaby volume: Settings Menu > SET MELODY > LULLABY >  > Set volume

Night Light

The Moon can be used as a simple nightlight. Replace the split display pane on the front side of the device with the single display pane included in the box. The panes can be removed by sliding them counterclockwise and pulling.

Settings Menu > NIGHT LIGHT > select image of single display pane

LED Backlight

The LED back light on the LCD screen can be turned on and off.

Settings Menu > LCD SCREEN > LED > Set WITH LED/NO LED

Brightness

The Brightness can be adjusted by switching the Brightness Switch from  to .
